Guadalupe Franco

Full-Stack Software Engineer

Querétaro, México | +52 442 351 0534 | franco.rguadalupe@gmail.com

guada-franco.pages.dev | linkedin.com/in/guadalupe-franco | github.com/gdpe-franco

Full-Stack Software Engineer with about 4 years of experience across SaaS platforms, APIs, and custom integrations. Takes work from technical design through deployment and production support, with a focus on backend engineering. Considers systems in context: the workflows they support and the people who rely on them. Cares about clean and reliable code.

Skills

Backend	PHP (Laravel, Symfony), Node.js (NestJS), Python (FastAPI, Pydantic)
APIs & access	REST & SOAP APIs, JWT, SAML 2.0 SSO, RBAC
Frontend	JavaScript, TypeScript, React, Vue.js (Nuxt), jQuery, HTML, CSS
Data stores	PostgreSQL, MySQL, Redis
Cloud & infra	Docker, AWS (S3, SQS, EC2), CI/CD (GitHub Actions, Jenkins), Cloudflare Pages
Engineering	Git, PHPUnit, pytest, Playwright, Design Patterns, SOLID Principles, Postman, OpenAPI (Swagger), New Relic, Sentry
AI & agents	LangGraph, Azure OpenAI, Model Context Protocol (MCP), Hermes Agent, Codex, Claude Code
Languages	Spanish (Native), English (C1), Portuguese (A1)

Experience

Software Engineer

Sep. 2025 – Jul. 2026

MedTrainer | Querétaro, México | Remote

- Delivered Symfony features for a SaaS platform serving 8,000+ organizations, owning design, implementation, testing, deployment, and production support.
- Authored and presented technical design proposals for peer review before implementation, contributing to architecture discussions and long-term platform improvements.
- Designed and shipped an internal MCP integration on OpenAI's Responses API, securely exposing internal platform data.
- Reviewed code and adopted AI tooling for research, prototyping, and routine engineering tasks.

Full-Stack Developer

Aug. 2023 – Sep. 2025

Mienvío | Monterrey, México | Remote

- Migrated a Laravel monolith from 5.2 to 6.x for a logistics platform serving 1,000+ active merchants, following version-by-version upgrades and fixing undocumented defects.
- Built and shipped public API v2 for shipment rates and label creation, connected the existing React app with a new UI, and staged the rollout to selected users with GrowthBook.
- Implemented SAML 2.0 single sign-on with Auth0 for enterprise customers.
- Maintained and refactored Shopify/WooCommerce and FedEx/UPS/Estafeta integrations in the monolith and Go & Python microservices, using AWS SQS for messaging, S3 for files, and EC2 for deployment.
- Conducted code reviews, onboarded new engineers, and collaborated with cross-functional teams to deliver customer-focused solutions.

Web Developer Intern

2022 – 2023

Universidad Politécnica de Querétaro | Querétaro, México | On-site

- Created UML diagrams for system analysis and planning, designed interfaces in Figma, and implemented PrimeVue views and Laravel API functionality.

Projects

AI Multi-Agent Coding Platform

- Built a Vue/FastAPI application that generates static web apps through LangGraph planning, coding, and review agents, using Azure OpenAI structured outputs and bounded correction loops.
- Separated HTTP requests from background execution with a PostgreSQL-backed worker, preserving project context, execution history, and approved previews; unresolved runs request user guidance.

Book Management System

- Built a Laravel/Vue dashboard with role-based access and a separate Node.js audit service, using Redis Streams and duplicate-safe event processing to record changes and notify clients through Socket.IO.

Education

B.Sc. in Computer Systems Engineering

2020 – 2023

Universidad Politécnica de Querétaro | Querétaro, México

Technical High School Diploma in Programming

2017 – 2020

CBTis 118 | Querétaro, México
